PROFESSIONAL SUMMARY

- B.Tech Information Technology student at MPSTME, NMIMS University, expected to graduate in 2029.
- Strong interest in full-stack web development, software engineering, and modern web technologies.
- Experienced in developing and deploying web applications from concept to production.
- Proficient in building responsive and user-focused applications with modern development tools and frameworks.
- Passionate about solving real-world problems through technology and continuously expanding technical expertise.

EDUCATION

Mukesh Patel School of Technology Management & Engineering (MPSTME), NMIMS University *Expected Graduation: 2029*

Bachelor of Technology (B.Tech) in Information Technology

Lokhandwala Foundation School *2013 – 2023*

Primary & Secondary Education

TECHNICAL SKILLS

Languages: JavaScript, Java, C++
Frontend Development: React.js, HTML, CSS, React Router
Backend Development: Node.js, Express.js
Database Technologies: MongoDB, MySQL
Tools & Platforms: Git, GitHub

PROJECTS

StudyForge [<https://study-ai-forge.netlify.app>] *Completed*

- Developed a centralized academic productivity platform designed to help students manage notes, assignments, and study resources in a single workspace.
- Created an intuitive dashboard experience that streamlines academic organization and improves accessibility to study materials.
- Implemented secure user authentication and personalized workflows to enhance user experience.
- Designed scalable architecture to support features such as collaboration tools, progress tracking, and advanced productivity modules.
- Optimized system performance to focus on usability, fluid responsive interfaces, and long-term codebase scalability.

Fitry [<https://fitry-2df38.web.app/>]

Completed

- Built a web platform that helps beginners identify the right tech career path before investing time in the wrong direction.
- Designed an intuitive guided experience that presents personalized tech role recommendations based on user interests and strengths.
- Developed a clean, responsive interface focused on simplicity and ease of use for non-technical audiences.
- Implemented scalable routing pathways and dynamic matching filters to offer quick navigation across potential career tracks.

Lumino [<https://lumino-show.netlify.app>]

Completed

- Developed an interactive digital showcase platform focused on presenting content through a clean and engaging user experience.
- Designed a structured and visually appealing interface that prioritizes accessibility and intuitive navigation.
- Implemented reusable and scalable application architecture to simplify future enhancements and maintenance.
- Optimized responsiveness to ensure a consistent experience across desktops, tablets, and mobile devices.
- Successfully deployed the platform for public access and ongoing improvements.

AREAS OF INTEREST

- **Full-Stack Web Development:** Building end-to-end web applications combining dynamic interfaces with scalable backend logic.
- **Software Engineering:** Applying algorithmic strategies, structural design patterns, and robust architecture principles to solve complex problems.
- **Open Source Technologies:** Collaborating within distributed ecosystems to contribute to shared, community-driven technical solutions.
- **UI/UX Design:** Crafting modern, accessible, and intuitive user experiences focused on clean typography and fluid interface navigation.
- **Cloud Deployment & Hosting:** Deploying web environments and applications securely to public networks using continuous pipelines.
- **Modern JavaScript Ecosystem:** Engineering solutions around modular runtimes, framework utilities, and modern runtime standards.
